

Did you know?

You can use Thrive-Online to identify and support the needs of your children.

How can Thrive-Online help me in my setting?

The whole group profiling tool is generally **available to all staff** in settings that are adopting the Thrive Approach. It is an **easy to use** resource that ensures a measured and systematic approach to the emotional development and wellbeing of all children.

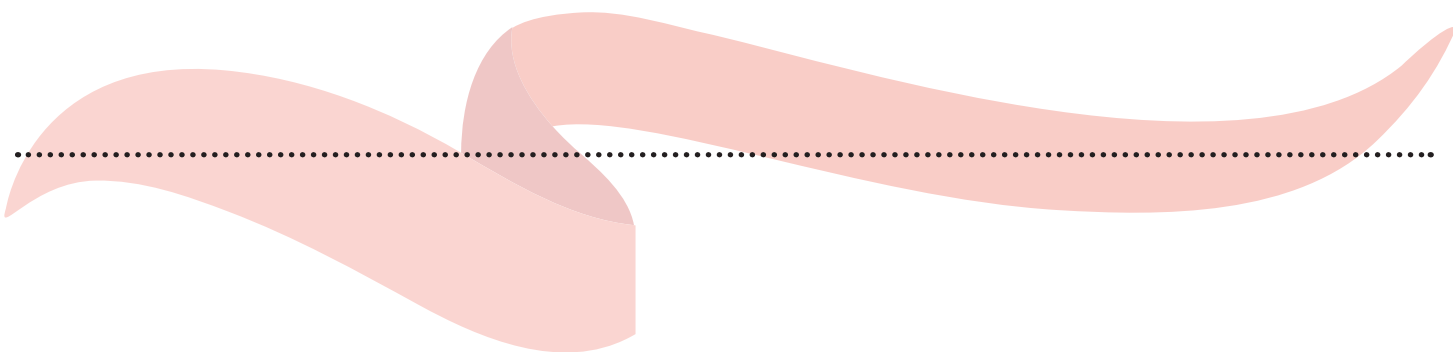

You can use Thrive-Online to profile whole groups of children and it will provide you with strategies to support the age appropriate emotional development of your group. It will identify those children working just below age-related expectations and offer group activities to help you support their development. It will also identify those children where the additional one-to-one support of your Licensed Practitioner is recommended.

How do I get started with Thrive-Online?

Just ask your settings assigned Thrive-Online organisation administrator to create you as a user on Thrive-Online.

Our designated Thrive-Online Organisation Administrator is:

You can contact the above person if you need Thrive-Online access or, alternatively, no longer need to use the programme.

Let's help every child
